

How Do I Get Started Without Any Money?

Occasionally someone has put their entire capital funding into their own project or business and is in a financial situation that has left them without any funds available to afford to start the REG D 504 Private Placement Memorandum and really needs to raise some immediate cash without being taken advantage of by an Angel (Demon) Investor. It is now a do or die situation and you are desperately needing funding. What can be done?

This situation occurs more than you realize and others have overcome the situation quickly and easily by following my situations.

It is done by approaching **ONLY** friends, relatives and people who know you and offering them a business deal. Simply explain to them that you are undergoing a very serious and important program that involves a Securities & Exchange (SEC) regulated process using a Private Placement Memorandum to raise \$1 millions for your business. Tell them that you need immediately help to afford to launch this program and if they will help you with a very short term loan that you will pay them back out of the first funds that come from the raising of money through the Private Placement Memorandum and that you will **GIVE** them 3 times what they help you with in stock which will be valued at \$1 per share.

Dozens of individuals annually have successfully raised money to start their Private Placement Memorandum process this way. I have experienced individuals turn things around very quickly this way. It is not recommended that you raise any more than \$25,000 or give up more than 75,000 in stock using this method.

To accomplish this you must let go of all preconceived notions, beliefs and feelings around asking for help and money. All pride must be abandoned. There is no shame in asking for help **IF** you believe in yourself, your project, and business and that each investor will truly benefit from being a shareholder in your corporation.

You must remember, this is a business deal and arrangement.
